Improvements Prevent Panel Damage!

Roger Lintern (Process Leader) Defender OTA briefing the team.

Pete Harper working on a Defender panel protectors in place!

South Works Off-Track, Process Area Managers, Gregg Niblett and Paul James have introduced bespoke panel protectors that are fitted to Defenders before any rework is undertaken.

The 32 complete sets of protectors cover all Defender Rectification areas and when not being used are stored on purpose build stands produced by Site Services.

Gregg and Paul worked with the OTA team to produce visual aids and provide training to accompany the introduction of the panel protectors.

Paul James said, " Both Defender and Range Rover have dedicated panel protection to help prevent damage, ensuring our customers receive the products they have ordered in pristine condition. I would like to thank all the members of the OTA Team without their full co-operation the successful introduction of this process would not have been possible."

No time to wait - in a rush . . .
